		Part I, Line 6a The Sisters of Charity Hospital/Sisters of Charity Hospital, St Joseph Campus Community Benefit Report is contained in a report prepared by the Catholic Health System

Identifier	ReturnReference	Explanation
		Part I, Line 7 Bad debt expenses of \$6,102,382 are included in Part IX, line 25, column (A) but subtracted when calculating the percentage in column (f) Part 1, line 7 Costing is a full step down methodology of cost from non-revenue producing departments to revenue producing departments', with assignment of cost to individual charge items based on volume and charge amount All patient accounts are cost with the same methodology regardless of patient type (inpatient, outpatient, emergency room, etc) or insurance coverage (Medicare, Medicaid, private insurance, uninsured, etc)

Identifier	ReturnReference	Explanation
		Part II Sisters Hospital provided Community Building in various ways, including Community Support by identifying the need to educate Senior Citizens in regards to Healthcare amenities The Environmental Improvements were noted in the form of Pharmaceutical Waste Disposal that was provided for the community throughout the year

Identifier	ReturnReference	Explanation
		Part III, Line 4 The amount in Part III line 2 is the actual bad debt expenses of \$6,102,382 written down to cost, utilizing the Uninsured Ratio of Cost to Charges (RCC) obtained from the full step down methodology of cost described in Part 1, line 7 The amount in Part III line 3 is the estimate of bad debt from uninsured balance which is developed as follows as policy is to write accounts to bad debt 120 days after discharge, the discharge date period of 10/1/2010 to 9/30/2011 was used to determine the population of uninsured accounts The balance of these accounts was determined and the RCC was applied to develop the estimate in Schedule H Part III Line 3 As our determination of eligibility for the Healthcare Assistance Program (HAP) (Charity Care) is based solely on the presentation for care without insurance, which is now for each account, and use of a sophisticated estimator (PARO) of each guarantor's ability to pay an estimate of "the amount that reasonably could be attributable to patients who likely would qualify for financial assistance under the hospital's charity care policy if sufficient information had been available to make a determination of their eligibility" is not relevant The organizations financial statements do not include a footnote that describes bad debt expense, but the financial statements account for bad debt expenses in the statement of operations as actual expenses written off and an estimate of future write-offs less any recoveries

Report of Independent Auditors

To the Board of Directors of the
Catholic Health System, Inc

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations and changes in net assets and of cash flows present fairly, in all material respects, the financial position of Sisters of Charity Hospital (a subsidiary of Catholic Health System, Inc) at December 31, 2011 and 2010, and the results of their operations and changes in net assets and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These consolidated financial statements are the responsibility of the Hospital's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 12, the Hospital had significant transactions with related parties.

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

1. Organization

Sisters of Charity Hospital is a not-for-profit acute care hospital. Sisters of Charity Hospital provides inpatient, outpatient and emergency services primarily for the residents primarily in and around its surrounding area. Admitting physicians are primarily practitioners in the local area. All operations are located in Erie County, New York and serve the community of Western New York.

Following the release of New York State's "Healthcare Facilities in the 21st Century" Report, also known as the Berger Commission, in 2006, St. Joseph Hospital (SJH) was slated for closure. The decision was later overturned after the State agreed to keep the Cheektowaga hospital open as part of Sisters Hospital. On April 1, 2009, St. Joseph Hospital officially closed and merged with Sisters of Charity Hospital, becoming Sisters of Charity Hospital, St. Joseph Campus (SJC). As the Catholic Health System was the sole corporate member of both St. Joseph Hospital and Sisters of Charity Hospital, the accounts of St. Joseph Hospital were merged into the results of Sisters of Charity Hospital as of January 1, 2009.

Sisters of Charity Hospital is the sole corporate member of Sisters Hospital Foundation, Inc. (the Foundation). The Foundation is a not-for-profit organization incorporated under the New York State Corporation Laws. The Foundation's sole purpose is to receive and administer gifts and bequests made on behalf of the Sisters of Charity Hospital, which are generally used to support the capital needs of the Sisters of Charity Hospital. On March 9, 2009, the St. Joseph Hospital Foundation received approval from the New York State Department of State to consummate a merger with the Sisters Hospital Foundation. The merger took place on April 1, 2009, contemporaneous with the merger of Sisters of Charity Hospital and St. Joseph Hospital. Per the merger, the assets of the St. Joseph Hospital Foundation were combined with those of the Sisters Hospital Foundation, as of January 1, 2009.

Sisters of Charity Hospital and the Foundation (collectively the Hospital) are a part of the Catholic Health System, Inc. (CHS or the System) and its organizational structure is discussed below.

System

Catholic Health System, Inc. and Subsidiaries is an integrated healthcare delivery system in Western New York jointly sponsored by the Sisters of Mercy, Daughters of Charity and the Diocese of Buffalo. Catholic Health East (CHE), Ascension Health System and the Diocese of Buffalo are the corporate members of CHS, with equal ownership interest. CHS is the sole corporate member of the following subsidiaries:

Acute Care Subsidiaries

The Acute Care Subsidiaries include Mercy Hospital of Buffalo (MHB), Kenmore Mercy Hospital including The McAuley Residence (KMH), and Sisters of Charity Hospital (SCH).

Long-Term Care Subsidiaries

The Long-term Care Subsidiaries include St. Francis Geriatric and Healthcare Services, Inc. (closed December 2009), St. Francis Home of Williamsville, Western New York Catholic Long-Term Care, Inc. (Father Baker Manor), St. Elizabeth's Home and St. Vincent's Home for the Aged.

Home Care Subsidiaries and Other

The Home Care and Other Subsidiaries include Mercy Home Care of Western New York, Inc., McAuley Seton Home Care (MSHC), OLV Renaissance Corporation, Catholic Health Infusion Pharmacy, Continuing Care Foundation and Catholic Health System Program Of All-Inclusive Care For The Elderly, Inc. (LIFE) (commenced operations in December 2009).

2. Significant Accounting Policies

The significant accounting policies applied in preparing the accompanying consolidated financial statements are summarized below

Principles of Consolidation

The consolidated financial statements of the Hospital include the accounts of Sisters of Charity Hospital and Sisters of Charity Foundation. All significant intercompany balances and transactions have been eliminated in the consolidated amounts.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates made by the Hospital include, but are not limited to, the reserves for conditional asset retirement obligations, reserve for bad debts, reserve for third-party payor contractual adjustments and allowances, the provision for estimated receivables and payables for final settlements with those payors, the insurance reserves for worker's compensation, professional and general liability, and actuarial assumptions used in determining pension expense.

Risks and Uncertainties

Investment securities are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the fair value of investment securities, it is at least possible that changes in risks in the near term could materially affect the net assets of the Hospital.

Laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates related to third-party payment matters will change by a material amount in the near term.

Cash and Cash Equivalents

The Hospital considers all highly liquid investments, generally with original maturities of three months or less when purchased, and short term investments (certificates of deposit), excluding amounts limited as to use, to be cash equivalents. The Hospital maintains funds on deposit in excess of amounts insured by the Federal Depository Insurance limits.

Inventory

Inventories are generally stated at the lower of cost (first-in, first-out) or market.

Investments and Investment Income

Investments in marketable securities with readily determinable fair values and all investments in debt securities are reported at their fair values in the consolidated statements of financial position. Realized and unrealized gains and losses are included in excess of revenues over expenses unless such earnings are restricted by donor or law. Investment income and gains restricted by a donor are reported as increases in unrestricted net assets if the restrictions are met (either by passage of time or by use) in the reporting period in which the income and gains are recognized.

Prepaid Expenses and Other Assets

Prepaid expenses and other assets consist of prepaid general expenses, interest, insurance recoveries, deferred financing costs, and other miscellaneous deferred charges. Amortization of financing costs is provided on the effective interest method over the maturity of the bond issues.

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

Property and Equipment

Property and equipment are stated at cost if purchased, or if contributed, at the fair market value on the date contributed. Depreciation is computed using the straight-line method over useful lives ranging from three to forty years. Equipment under capital lease is amortized on the straight-line method over the shorter period of the lease term or the estimated useful life of the equipment. Such amortization is included in depreciation and amortization in the consolidated financial statements. Gifts of long-lived assets such as land, building, or equipment are reported as unrestricted support unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as restricted supports. Absent explicit donor stipulations about how long these long-lived assets must be maintained, expirations of donor restrictions are reported when the donated or acquired long-lived assets are placed in service.

Impairment of Long-Lived Assets

The Hospital evaluates its long-lived assets for financial impairment as events or changes in circumstances indicate that the carrying amount of such assets may not be fully recoverable. The Hospital evaluates the recoverability of long-lived assets not held for sale by measuring the carrying amount of the assets against the estimated undiscounted future cash flows associated with them. If such evaluations indicate that the future undiscounted cash flows of certain long-lived assets are not sufficient to recover the carrying value of such assets, the assets are adjusted to their fair values. Based on these evaluations, there were no adjustments to the carrying value of long-lived assets in 2011 and 2010.

Net Patient/Resident Service Revenue

Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payors, and others for services rendered including estimated adjustments under various reimbursement agreements with third-party payors. The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. Payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges, and per diem payments. Third-party payors retain the right to review and propose adjustments to amounts recorded by the Hospital. Such adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined. CHS's Healthcare Assistance Program provides discounts to patients based on need. In addition, the System will also assist patients with the application process for free or low-cost insurance. Those uninsured patients who do not qualify for the Healthcare Assistance Program or low-cost insurance and live in New York State, a state contiguous to New York State, or the state of Ohio, are provided an uninsured discount based on a service specific uninsured rate. This uninsured rate is similar in calculation method and amount to third party payor methods and rates.

Under the New York Health Care Reform Act (NYHCRA), hospitals are authorized to negotiate reimbursement rates with certain non-Medicare payors except for Medicaid, Workers' Compensation and No-fault, which are regulated by New York State. These negotiated rates may take the form of rates per discharge, reimbursed costs, discounted charges or as per diem payments. Reimbursement rates for non-Medicare payors regulated by New York State are determined on a prospective basis. These rates also vary according to a patient classification system defined by NYHCRA that is based on clinical, diagnostic and other factors.

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

A summary of the payment arrangements with major third-party payors follows

- **Medicare.** Inpatient acute care services and outpatient services rendered to Medicare program beneficiaries are paid at prospectively determined rates. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. The Hospital is reimbursed at a tentative rate with final settlement determined after submission of annual cost reports by the Hospital and audits thereof by the Medicare Administrative Contractor. Cost reports have been audited and finalized by the Medicare Administrative Contractor through December 31, 2006. Effective October 1, 2007, the Centers for Medicare and Medicaid Services (CMS) revised the Medicare patient classification system. The new Medicare severity adjusted diagnosis related groups (MS-DRGs) reflect changes in technology and current methods of care delivery. CMS has expanded the number of DRG's from 538 to 745 and requires identification of conditions that are present upon admission.
- **Non-Medicare.** The New York Health Care Reform Act of 1996, as updated, governs payments to hospitals in New York State. Under this system, hospitals and all non-Medicare payors, except Medicaid, Workers' Compensation and No-Fault insurance programs, negotiate hospital's payment rates. If negotiated rates are not established, payors are billed at hospitals established charges. Medicaid, Workers' Compensation and No-Fault payors pay hospital rates promulgated by the New York State Department of Health (DOH) on a prospective basis. Adjustments to current and prior years' rates for these payors will continue to be made in the future. Effective December 1, 2009, NYS implemented inpatient reimbursement reform. The reform updated the data utilized to calculate the NYS DRG rates and service intensity weights (SIWS) in order to utilize refined data and more current information in DOH promulgated rates. Similar type outpatient reforms were implemented effective December 1, 2008.

Amounts recognized in 2011 and 2010 related to prior years, including adjustments to prior year estimates and audit settlements, increased revenues approximately \$3,200,000 and \$2,880,000, respectively. These changes in estimates related to estimates for prior years cost report reopening, appeals, and tentative final cost reports, some of which are still subject to audit, additional reopening, and/or appeals.

Approximately 52% and 50% of net patient/resident service revenue was generated from services rendered to patients/residents under Medicare and Medicaid programs in 2011 and 2010, respectively. Approximately 28% and 30% of net patient/resident service revenue was generated from services rendered to patients under managed care programs in 2011 and 2010.

Charity Care

The System provides services to all patients regardless of ability to pay. A patient is classified as a charity patient based on income eligibility criteria as established by the Healthcare Assistance Program (HAP) which is determined by presentation for care without insurance, while using an estimator (PARO) of each guarantor's ability to pay. Free care is determined at 110% of Federal Poverty Guidelines (FPG), whereas discounted care is also provided at 500% FPG.

Of the Hospital's total expenses, an estimated \$3,262,778 and \$2,168,974 arose from providing services to charity care patients in 2011 and 2010, respectively. Costing is a full step down methodology of cost from non-revenue producing departments to revenue producing departments, with assignment of cost to individual charge items based on volume and charge amount. Additional costs for the Hospitals include required payments for a gross receipts assessment to New York State which is used to fund the New York State Medicaid program and the Health Care Reform Act.

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

(HCRA) Revenues that offset the costs of Charity Care include payments from the New York State Uncompensated Care Pools

The Hospital provides care to patients at no charge or at a discounted rate who meet eligibility requirements under its Health Care Assistance Policy (charity care). In addition to charity care, the Hospital provides services to patients covered by Medicaid. The payments received for services provided to patients covered by Medicaid may be at or below costs in addition to the cost of care for patients without insurance.

Operating and Nonoperating Revenue

The System's primary mission is dedicated to meeting the health care needs in the regions in which it operates. The System is committed to providing a broad range of general and specialized health care services including inpatient, primary care, long-term care, outpatient services, and other health care related services. Only those activities directly associated with the furtherance of this mission are considered to be operating activities. Such activities include operation of cafeterias, parking lots, rental real estate and other ancillary activities. Other activities that result in gains or losses unrelated to the System's primary mission are considered to be nonoperating.

Electronic Health Record Incentive Payments

The American Recovery and Reinvestment Act of 2009 provides for Medicare and Medicaid incentive payments beginning in 2011 for eligible hospitals and professionals that adopt and meaningfully use certified electronic health record ("EHR") technology. The Hospital recognizes income related to Medicare and Medicaid incentive payments using a gain contingency model that is based upon when our eligible hospitals have demonstrated meaningful use of certified EHR technology for the applicable period and the cost report information for the full cost report year that will determine the final calculation of the incentive payment is available.

Medicaid EHR incentive calculations and related payment amounts are based upon prior period cost report information available at the time our eligible hospitals adopt, implement or demonstrate meaningful use of certified EHR technology for the applicable period, and are not subject to revision for cost report data filed for a subsequent period. Thus, incentive income recognition occurs at the point the hospital adopts, implements or demonstrates meaningful use of certified EHR technology for the applicable period, as the cost report information for the full cost report year that will determine the final calculation of the incentive payment is known at that time. Medicare EHR incentive calculations and related initial payment amounts are based upon the most current filed cost report information available at the time the hospital demonstrates meaningful use of certified EHR technology for the applicable period. However, unlike Medicaid, this initial payment amount will be adjusted based upon an updated calculation using the annual cost report information for the cost report period that began during the applicable payment year. Thus, incentive income recognition occurs at the point the hospital demonstrates meaningful use of certified EHR technology for the applicable period and the cost report information for the full cost report year that will determine the final calculation of the incentive payment is available.

The Hospital recognized \$2.7 million of electronic health record incentive income related to Medicare incentive programs during the year ended December 31, 2011 which is recorded in Other operating revenue.

Excess of Revenues over Expenses

The statement of operations and changes in net assets includes excess of revenues over expenses, commonly referred to as the performance indicator. Changes in unrestricted net assets which are excluded from excess of revenues over expenses, consistent with industry practice, include permanent transfers of assets to and from affiliates for other than goods and services, contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for the purposes of acquiring such assets), and the effective portion of cash flow hedging derivatives.

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

Net Assets

Unrestricted assets are available for the general operating expenses of the System and are not subject to any donor limitations

Temporarily restricted net assets are those whose use is limited by donors to a specific period or purpose and includes the temporarily restricted net assets of Sister's Hospital Foundation, Inc. Temporarily restricted net assets are released to unrestricted net assets as restrictions are met, which can occur in the same period. Gifts whose restrictions are met in the same period in which they are received are recorded as an increase in unrestricted net assets. Such restrictions include purpose restrictions where donors have specified the purpose for which the net assets are to be spent, or time restrictions imposed by donors or implied by the nature of the gift, pledges to be paid in future periods, life income funds. Investment return is included in unrestricted net assets unless the return is restricted by donor or law.

Permanently restricted net assets have been restricted by donors to be maintained by the Hospital in perpetuity.

Income Taxes

The consolidated financial statements do not include a provision for income taxes as the Hospital is a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code. The tax-exempt organizations are subject to federal taxes on unrelated business income under section 511 of the Internal Revenue Code which are reported as other expenses in these consolidated financial statements.

Capitalized Software Costs

The Hospital capitalizes certain costs that are incurred to purchase or to create and implement internal-use computer software, which includes software coding, installation, testing and certain data conversion from both internal and external providers in accordance with accounting guidance. These capitalized costs are amortized on a straight-line basis over ten years and reviewed for impairment on an annual basis. The Hospital capitalized software, computer equipment, and other external costs of \$3,138,097 and \$1,255,743 during 2011 and 2010, respectively. Capitalized internal project labor costs amounted to \$1,052,374 and \$312,385 during 2011 and 2010, respectively.

Reclassifications

Certain prior year amounts were reclassified to conform to the 2011 consolidated financial statement presentation.

Subsequent Events

The Hospital evaluated subsequent events through May 14, 2012 which was the date the financial statements were issued.

3. New Authoritative Pronouncements

In August 2010, the FASB issued guidance that requires health care entities to use cost as the measurement basis for charity care disclosures and defines cost as the direct and indirect costs of providing charity care. The amended disclosure requirements are effective for fiscal years beginning after December 15, 2010 and must be applied retrospectively. Note 2 - Charity Care reflects the amended disclosure requirements. Since the new guidance amends disclosure requirements only, its adoption did not impact the Hospital's statement of financial position, statement of operations, or cash flow statement.

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

In August 2010, the FASB amended the Accounting Standards Codification ("ASC") to extend the guidance on netting receivables and payables in ASC 210-20, "Balance Sheet Offsetting, to health care entities, prohibiting offsetting of conditional or unconditional liabilities with anticipated insurance recoveries from third parties. The amended guidance is effective for fiscal years beginning after December 15, 2010. The Hospital adopted the amended guidance on January 1, 2011. The Hospital did not recognize a cumulative effect adjustment to beginning net assets as of January 1, 2011 because the increase to liabilities as a result of adopting the amended guidance was equal to the increase in insurance recoveries receivable. Because the Hospital elected not to retrospectively adopt the amended guidance, there was no impact on the Hospital's prior period statements of financial position, statements of operations, or cash flow statements.

In July 2011, the FASB issued ASU 2011-07, Health Care Entities (Topic 954) Presentation and Disclosure of Patient Services Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities. ASU 2011-07 includes amendments to FASB's ASC Topic 954, Health Care Entities. The objective of the update is to provide financial statement users with greater transparency about a health care entity's net patient service revenue and the related allowance for doubtful accounts. The amendments requires health care entities that recognize significant amounts of patient service revenue at the time services are rendered, even though they do not immediately assess the patients' ability to pay, to present the provision for bad debts related to patient service revenue as a deduction from patient service revenue (net of contractual allowances and discounts) on their statement of operations. The standard is effective for January 1, 2012 and is not expected to have a significant impact on the consolidated financial statements.

8. Long-Term Obligations

Long-Term Debt

Long-term debt inclusive of capital lease obligations are comprised of the following at December 31

	2011	2010
2006 Series B and D Bonds Payable (a)	\$ 30,288,116	\$ 31,961,032
Capital lease obligations at varying interest rates ranging from 3.89% to 8.10%	<u>7,808,693</u>	<u>8,695,475</u>

	<u>\$ 33,983,300</u>	<u>\$ 36,292,056</u>

- (a) In 2006, the System formed the Acute Care Obligated Group (the Obligated Group), consisting of its three primary hospitals (MHB, SOC, and KMH) and the parent. No affiliates of CHS other than the Members of the Obligated Group were included in this offering. Collectively, the Obligated Group refinanced all outstanding indebtedness of the Obligated Group. On November 29, 2006, \$68,820,000 of Dormitory Authority of the State of New York (DASNY or the Authority) Catholic Health System Obligated Group Revenue Bonds, Series 2006 were issued. The Series 2006 B Bonds for \$30,295,000 were loaned to the Hospital for the purpose of refunding the Authority's Hospital Insured Revenue Bonds, Series 2003, which bonds were issued for the purpose of refunding a series of bonds issued in 1991. The Series 2006 D Bonds for \$8,435,000 were loaned to Sisters of Charity Hospital, St. Joseph Campus to finance the cost of SJH's emergency room expansion project. The discount on the bonds of \$363,937 will be accreted over the life of the bonds.

In connection with the issuance of the Series 2006 Bonds, the Obligated Group entered into a Loan Agreement (the Loan Agreement) whereby the Obligated Group is required to pay funds sufficient in timing and amount to pay the principal and redemption price of the Series 2006 Bonds and related interest and administrative expenses as they come due. The Series 2006 Bonds pay interest at a variable remarketed rate and are collateralized by a Letter of Credit with HSBC Bank which expires on November 29, 2014. In the event the letter of credit is not renewed at expiration, the outstanding Bonds, at the option of the members of the Obligated Group, will convert to a five year (initial) Term Loan. Repayment of the principal of Initial Term Loan shall be identical to the scheduled principal payments on the Bonds with the remaining amount due at the end of the five year term.

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

The interest borne by the Series 2006 Bonds will be determined by the Remarketing Agent to be the lowest rate that, in the judgment of the Remarketing Agent, under prevailing financial market conditions, enables such Series 2006 Bonds to be sold at a price of par. The variable interest rate was 0.11% and 0.33% at December 31, 2011 and 2010, respectively.

The Loan Agreement specifies that the Hospital shall continuously pledge, as a security for the payment of all liabilities and the performance of all obligations of the Hospital pursuant to the loan agreement, a security interest in and assignment of the gross receipts of the Hospital, together with the Hospital's right to receive or collect the gross receipts. Further, the Hospital delivered a mortgage to secure all obligations and liabilities of the Hospital under the Loan Agreement. As further security to the Loan Agreement, the Hospital granted DASNY a security interest in such fixtures, furnishings and equipment as owned by the Hospital. In addition, a letter of credit in the amount of the bonds was entered into with HSBC Bank USA to provide security on the Series 2006 Bonds.

Certain financial covenants must be maintained by the Obligated Group. Failure to comply with these covenants requires a formal consultants report and quarterly progress reports demonstrating how the facility is progressing towards compliance. The Loan Agreement requires the Obligated Group to comply with certain financial covenants, including maintenance of (i) a minimum number of days cash on hand, (ii) long-term debt service coverage, (iii) a maximum leverage ratio. The Obligated Group was in compliance with these covenants at December 31, 2011 and 2010, respectively.

Aggregate maturities of long-term obligations, including capital lease obligations, subsequent to December 31, 2011 are as follows:

	Long-Term Debt	Capital Leases	Total
2012	\$ 1,760,000	\$ 2,680,324	\$ 4,440,324
2013	1,830,000	2,320,614	4,150,614

Operating Leases

Future minimum lease payments under non-cancellable operating leases (net of sublease rentals) are as follows

2012	\$	1,490,397
2013		1,405,090
2014		810,175
2015		780,982
2016		651,222
Thereafter		169,993
	\$	<u>5,307,859</u>

Total expense for rents and operating type leases was approximately \$1,557,541 and \$1,527,527 for 2011 and 2010, respectively

9. Derivative Financial Instruments

In connection with the issuance of the Series 2006 Bonds and execution of the Loan Agreement, the Hospital entered into an interest rate swap agreement (a derivative agreement) with HSBC Bank USA, NA (HSBC) for purposes of mitigating risk posed by the Bonds accruing interest at a variable rate. Further, the Hospital agreed not to take or omit to take any action that could reasonably be expected to result in the termination of the derivative agreement unless otherwise approved by HSBC, provided, however, that termination of the derivative agreement shall not constitute an event of default for purposes of the Loan Agreement, but upon any such termination of the derivative agreement, HSBC may require that the Hospital direct the Series 2006 Bonds to be converted into bonds that bear a fixed rate of interest. The terms of the swap require the Hospital to pay a fixed rate of 3.80% on the notional amount (\$31,415,000 at December 31, 2011) and in exchange, the Hospital will receive a variable rate payment based upon the Securities Industry and Financial Markets Association Index, calculated weekly. The notional amount of the swap is matched to the maturity schedule of the Series 2006 Bonds. The swap agreement was executed on December 13, 2006 and expires July 1, 2025. These dates correlate to the issue date and due date of the Series 2006 Bonds. In accordance with accounting guidance, the instrument qualifies for hedge treatment and is designated a cash flow hedge of future interest payments. The effective portion of the hedge has been excluded from excess of revenues over expenses and recorded within changes to net assets.

The fair value of derivative instruments at December 31 is as follows

		2011		2010	
		Balance Sheet		Balance Sheet	
		Location	Fair Value	Location	Fair Value
Interest rate contracts					
Floating to fixed	Investment rate swap	\$	<u>4,847,339</u>	Investment rate swap	\$ <u>2,782,766</u>

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

The effects of derivative instruments on the consolidated statements of operations and changes in net assets for 2011 and 2010 are as follows

	Amount of Gain (Loss) Recognized in Statement of Operations		Amount of Gain (Loss) Recognized in Net Assets	
	2011	2010	2011	2010
Change in fair value of interest rate swaps	\$ 62,663	\$ (15,838)	\$ (2,001,910)	\$ (483,947)

The Hospital measures its interest rate swaps at fair market value on a recurring basis. The fair market value of the interest rate swaps is determined based on financials models that consider current and future market interest rates and adjustments for non-performance risk. The inputs utilized in the valuation process of the interest rate swaps are considered to be Level 2 within the fair value hierarchy defined in Note 14.

10. Employee Benefit Plans

Pension Arrangements

Effective January 1, 2001, the System began maintaining a qualified defined benefit pension plan covering substantially all of its employees at its five constituent hospitals. As of that date, active participants in the KMH, MHB, SJH and SCH (the Hospitals) plans who were employed at the Hospitals, are covered under the Retirement Plan of the Catholic Health System (the Plan). Effective January 1, 2002, all other entities in the System, with the exception of the Nazareth Home, began participation in the Plan. Pension assets and liabilities from legacy plans, if any, were transferred to the Plan on September 25, 2002.

Effective January 1, 2001 or 2002, as applicable, all non-union employees who had met the age and service requirements under their previous plan were given the option of choosing to participate in the cash balance feature of the Plan. Those who choose not to participate in the cash balance feature accrue benefits under the same formula as their previous plan. All non-union employees who become participants after that date automatically participate under the cash balance formula.

The Plan bases benefits upon both years of service and earnings. Participants under the Hospitals formula earn benefits under a final average formula. The cash balance formula is a hypothetical account balance formula. A participant's benefit obligation is assigned to the location at which the person works. As participants transfer around the System to other CHS subsidiaries, the obligations and a proportional amount of the plan's assets transfer.

Sisters of Charity Hospital

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

Since the Hospital is a participant in the System's plan, the following disclosures are made for the entire plan in the aggregate

The estimated prior service cost, and net loss that will be amortized from unrestricted net assets into net periodic pension cost over the next fiscal year for the System are \$229,260 and \$13,925,937, respectively

The Plan's investment policies and strategies were used to develop the expected long-term rate of return on risk-free investment (primarily government bonds), the historical level of the risk premium associated with the other asset classes in which the portfolio is invested and the expectations for future returns of each asset class. The expected return of each asset class was then weighted based on the target asset allocation to develop the expected long-term rate of return on assets assumption

The Plan's target asset allocation for 2012 and the actual asset allocation percentages for 2011 and 2010 are as follows at the respective measurement dates

Asset Category	Pension target allocation	Percentage of pension plan assets	
	2012	2011	2010
Equities	60%	50%	51%
Fixed Income	20%	37%	33%
Other	20%	13%	16%
	100%	100%	100%

The portfolio is diversified among a mix of assets including large and small cap, domestic and foreign equities, fixed income, alternatives (a fund of hedge funds), and cash. Asset mix is targeted to a specific allocation, either intermediate or long-term, that is established by evaluating expected return, standard deviation, and correlation of various assets against the plan's long-term objectives. Asset performance is monitored quarterly and rebalanced if asset classes exceed explicit ranges. The investment policy governs permitted types of investments, and outlines specific benchmarks and performance percentiles. The Investment Subcommittee of the Stewardship Committee of the CHE Board oversees the pension investment program and monitors investment performance. Risk is closely monitored through the evaluation of portfolio holdings and tracking the beta and standard deviation of the portfolio performance. The use of derivative financial instruments as an investment vehicle is specifically limited.

The following tables present the Plan's financial instruments as of December 31, 2011 and 2010, measured at fair value on a recurring basis using the fair value hierarchy defined in Note 14

December 31, 2011	Total	Level 1	Level 2	Level 3

Contributions

Contributions to the Plan are made to make benefit payments to plan participants. The funding policy is to contribute amounts to the trusts sufficient to meet minimum funding requirements plus such additional amounts as may be determined to be appropriate. Contributions are made to benefit plans for the sole benefit of plan participants. The System is expected to contribute an aggregate amount of approximately \$17,700,000 to the pension plan trust in 2011 to be allocated amongst participating entities.

Benefit Payments

The following table summarizes the System's estimated future benefit payments. Actual benefit payments may differ from expected benefit payments.

2012	\$ 13,398,000
2013	14,876,000
2014	16,441,000
2015	18,227,000

11. Insurance Arrangements

The System, on the Hospital's behalf, participates in the CHE insurance program which provides coverage for healthcare professional (medical malpractice) and general liability exposures. The primary limits for healthcare professional and general liability are \$3 million per occurrence and are insured by Stella Maris Insurance Company, Ltd. (SMICL), a Cayman-domiciled insurer wholly-owned by CHE. SMICL also provides excess coverage to the System, and this excess coverage is fully reinsured with non-affiliated commercial insurance companies. SMICL retains the full risk in the primary layer and no risk in the excess layers.

The coverage provided by SMICL is on a claims-made basis. The System, on the Hospital's behalf, therefore retains the liability for unasserted claims resulting from incidents that occurred on services provided prior to the financial statement date. The System has independent actuaries estimate the ultimate costs of such unasserted claims, which were discounted at 4% in 2011 and 2010. The Hospital's portion of the System's liability for unpaid and incurred but not reported claims at December 31, 2011 and 2010 is \$14,260,000 and \$2,789,000, respectively, recorded in accrued expenses and other long-term liabilities. The charges to expenses for professional and general liability for 2011 and 2010 approximated \$2,347,000 and \$2,224,000, respectively, which has been included in insurance expense. Amounts recognized as insurance receivables related to the claims approximate \$11,339,000 at December 31, 2011. Insurance recoveries are measured on the same basis as the liability subject to the need for a valuation allowance for uncollectible amounts.

The System's insurance program for workers' compensation, in which the Hospital participates, has a deductible of \$350,000 per occurrence. Claims in excess of self-insurance levels are fully insured. Losses from asserted claims and from unasserted claims identified by the System's incident reporting for the Hospital were accrued on an undiscounted basis based on actuarial estimates of the settlement of such claims.

The Hospital's portion of the System's current portion of liabilities for unpaid and incurred but not reported claims at December 31, 2011 and 2010 is \$1,740,959 and \$1,562,924, respectively, and is included in accrued expenses. The Hospital's portion of the System's long term portion of liabilities for unpaid and incurred but not reported claims at December 31, 2011 and 2010 is \$13,256,098 and \$5,616,095, respectively, and is included in other long-term insurance liabilities. Amounts recognized as insurance receivables related to the claims approximate \$6,336,000 at December 31, 2011. Insurance recoveries are measured on the same basis as the liability subject to the need for a valuation allowance for uncollectible amounts.

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

The charges to expense for workers compensation costs for 2011 and 2010 approximated \$3,969,000 and \$2,903,000, respectively, and are included in employee benefits expense. The System's insurance for employee health costs, in which the Hospital participates, is self-insured up to \$350,000 per claim. Claims in excess of self-insurance levels are fully insured. Claims are accrued based upon the Hospital's estimates of the aggregate liability for claims incurred using certain actuarial assumptions used in the insurance industry and based on the System's experience. Charges were billed monthly by the System and are included in employee benefit costs.

12. Related Party Transactions

The Hospital is one of a group of healthcare providers who are affiliated as a result of their association with the Catholic Health System, Inc. (the System).

During 2011 and 2010, the Hospital recorded expenses to affiliates for administration services, rent and other services. These expenses approximated \$47,960,206 and \$41,684,000 for 2011 and 2010, respectively and are recorded in the statement of operations and changes in net assets. The Hospital also provided cost sharing services to and received reimbursement from affiliates for laboratory, computer and other services. Revenue from these services approximated \$2,296,000 and \$3,177,000 for 2011 and 2010, respectively.

During 2011 and 2010 distributions were made from (to) from the parent totaling \$4,168,847 and \$(43,610), respectively. During 2011 and 2010, the Hospital received cash payments from affiliates and made cash payments to affiliates in the normal course of operations.

Amounts due to affiliates at December 31, 2011 and 2010 were \$13,950,984 and \$5,529,404, respectively. Amounts due from affiliates at December 31, 2011 and 2010 were \$11,023,441 and \$10,814,370, respectively. Amount due from parent of \$8,362,249 represents an uncollateralized demand note receivable with interest only payable monthly at 0%. It is the intention of the Hospital and the System that this loan will not be repaid within the next year. Accordingly, the outstanding loan is classified as a non-current asset, due from affiliate.

Caritas Medical Arts Building L L C is a joint venture between Sisters of Charity Hospital and Ciminelli Development Company. In 2009, Caritas Medical Art Building, L L C refinanced its mortgage. As of December 31, 2011, there was \$2,131,504 of debt outstanding, of which the Hospital has guaranteed \$710,501. Per the guaranty agreement, the Hospital's obligation shall decrease on a dollar for dollar basis as the principal amount of the obligation is paid down.

13. Legal Matters

The Hospital is involved in litigation and regulatory investigations arising in the course of business. The health care industry is subject to numerous laws and regulations of federal, state and local governments. Compliance with these laws and regulations can be subject to future government review and interpretation as well as regulatory actions unknown or unasserted at the time. Recently, government activity has increased with respect to investigations and allegations concerning possible violations by health care providers of fraud and abuse statutes and regulations, which could result in the imposition of significant fines and penalties as well as significant repayments for patient services previously billed under Medicare and Medicaid programs in the current and preceding years. Management believes it is in compliance with such laws and regulations and no unknown or unasserted claims were known at this time, which could have a material adverse effect on the Hospital's future financial position, results from operations or cash flows.

14. Fair Value Measurements

The following methods and assumptions were used by the Hospital in estimating fair value disclosures for consolidated financial statements

Cash and Cash Equivalents

The carrying amount reported in the balance sheet for cash and cash equivalents approximates its fair value

Investments

The fair values for marketable equity, marketable debt, government, and fixed income securities are valued at the closing price reported on the active market on which the individual securities are traded

Interest Rate Swap

The Hospital has entered into standard International Swaps and Derivatives Association (ISDA) interest rate swap agreements (the Swap Agreements) to manage the interest rate risk associated with its debt. The Swap Agreements effectively convert a portion of our variable rate debt to a long-term fixed rate. Under these agreements, the Hospital receives a variable rate based on the Securities Industry and Financial Markets Association Index plus a markup and pay a fixed rate. The fair value of these interest rate derivatives are based on quoted prices for similar instruments from a commercial bank, and therefore, the interest rate derivatives are considered a Level 2 item

Assets and liabilities recorded at fair value in the balance sheet are categorized based upon the level of judgment associated with the inputs used to measure their fair value. An asset or a liability's categorization within the fair value hierarchy is based on the lowest level of judgment input to its valuation. Hierarchical levels, as defined by accounting guidance, are directly related to the amount of subjectivity associated with the inputs to fair valuation of these assets and liabilities as follows

Level I – Valuations based on quoted prices in active markets for identical assets or liabilities that the Hospital has the ability to access. Since valuations are based on quoted prices that are readily and regularly available in active market, valuation of these products do not entail a significant degree of judgment. Level I assets include cash and cash equivalents, debt and equity securities that are traded in an active exchange markets, as well as certain U.S. Treasury and other U.S. Governments and agencies bonds that are highly liquid and are actively traded in over-the-counter markets

Level II – Valuations based on quoted prices in active markets for similar assets or liabilities, quoted prices in markets that are not active or for which all significant inputs are observable, directly or indirectly. Level II assets include equity and fixed income managed funds with quoted prices that are traded less frequently than exchange-traded instruments whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data

Level III – Valuations based on inputs that are unobservable and significant to the overall fair value measurement. These are generally company generated inputs and are not market based inputs. Level III assets would include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques as well as instruments for which the determination of fair value requires significant investment management judgment or estimation

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

Financial instruments measured at fair value are based on one or more of the three valuation techniques noted in fair value guidance. The three valuation techniques are as follows:

Market approach: Prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.

Cost approach: Amount that would be required to replace the service capacity of an asset (i.e., replacement cost).

Income approach: Techniques to convert future amounts to a single present amount based on market expectations (including present value techniques and option-pricing models).

The following tables present information about assets and liabilities that are measured at fair value on a recurring basis and indicate the fair value hierarchy of the valuation techniques utilized to determine such fair value as of December 31, 2011 and 2010.

15. Concentrations of Credit Risk

The Hospital grants credit without collateral to its patients, most of who are residents of Western New York and are insured under third-party agreements. The mix of receivables from patients and third-party payors at December 31 are as follows:

	2011	2010
Medicare	29%	31%
Medicaid	18%	18%
Blue Cross	8%	6%
Other third-party payors	34%	35%
Patients	11%	10%
	<u>100%</u>	<u>100%</u>

The Hospital maintains funds in excess of amounts insured by the Federal Depository Insurance limits. The Hospital has diversified its deposit amounts in a variety of institutions to reduce the level of concentrated credit risk.

16. Functional Expenses

The Hospital provides general health care services to residents within its geographic location. Expenses relating to providing these services included in the statement of operations are as follows:

	2011	2010
Health care services	\$ 222,938,102	\$ 216,242,825
General and administrative	<u>74,136,832</u>	<u>74,627,843</u>
	<u>\$ 297,074,934</u>	<u>\$ 290,870,668</u>

Report of Independent Auditors on Accompanying Other Information

To the Board of Directors of the
Catholic Health System, Inc

We have audited the consolidated financial statements of Sisters of Charity Hospital (a subsidiary of Catholic Health System, Inc) as of December 31, 2011 and for the year then ended and our report thereon appears on page 1 of this document. That audit was conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The Schedule of Net Cost of Providing Care of Persons Living in Poverty and Community Benefit Programs (Schedule of Social Accountability) is the responsibility of management and is provided for purposes of additional analysis on the consolidated financial statements. Accordingly, we do not express an opinion on the Schedule of Net Cost of Providing Care of Persons Living in Poverty and Community Benefit Programs (Schedule of Social Accountability).
